

PRAKTIKUM (M/W) FRONTEND/BACKEND WEB ENTWICKLER IN DER INDUSTRIE-ROBOTIK

Use robots as easy as smartphones

We are a robotics start-up of the Fraunhofer Institute for Production Engineering and Automation (IPA) in Stuttgart. We develop an innovative software for intuitive operation of robots. This will enable robots to be used flexibly and without experts even in small quantities in the future. This will help the industry to master the fourth industrial revolution!

What we expect from you

- Interest in cloud-robotics and automation technology
- First experience with web technologies (especially JavaScript, HTML, CSS)
- Ideally already practical experience with Angular.JS or Node.JS
- Independent & structured working as well as a safe appearance
- High motivation, independence, creativity and teamwork

What we can offer you

- Motivating, open working atmosphere with a start-up atmosphere
- Dynamic, interdisciplinary team
- Exciting tasks with a lot of creative freedom
- Insight into the robotics industry
- Fair, reasonable pay

WE ARE LOOKING FORWARD TO HEARING FROM YOU
